PUBLIC HEALTH REPORTS.

UNITED STATES.

[Reports to the Surgeon-General Public Health and Marine-Hospital Service.]

Ordinance of the city and county of San Francisco respecting varicella.

SAN FRANCISCO, CAL., *July 9, 1902.*

SIR: I have the honor to transmit herewith an ordinance of the city and county of San Francisco respecting varicella.

Respectfully,

M. J. WHITE,
Assistant Surgeon, In Command.

[Inclosure—Bill No. 647—Ordinance No. 515.]

An ordinance requiring the reporting of varicella to the health officer:

Whereas, experience demonstrates that varioloid is frequently mistaken for varicella and many lives thereby imperiled, therefore, be it ordained by the people of the city and county of San Francisco, as follows:

Section 1. Every physician practicing in this city and county shall report in writing to the health officer every case of varicella or chicken pox of which he may have professional knowledge within twenty-four hours after he shall be satisfied of the nature of the disease.

Sec. 2. Any person violating the above provision shall upon conviction thereof be guilty of a misdemeanor and shall be punished by a fine not exceeding $500 or imprisonment in the county jail for not more than six month, or by both such fine and imprisonment.

In board of supervisors, San Francisco, June 23, 1902.

After having been published five successive days, according to law, taken up and passed by the following vote:

Ayes.—Supervisors Alpers, Bent, Booth, Brandenstein, Braunhart, Connor, Curtis, D'Ancona, Eggers, Loughery, Payot, Wynn.

Absent.—Supervisors Boxton, Comte, Lynch, McClellan, Sanderson, Wilson.

CHAS. W. FAY,
Clerk.

Approved, San Francisco, June 30, 1902.

E. E. SCHMITZ,
Mayor and exofficio President of the Board of Supervisors.

Smallpox at Palmetto and Live Oak, Manatee County, Fla.

TAMPA BAY QUARANTINE,
Mullet Key, Fla., July 11, 1902.

SIR: I have the honor to state that I was informed to day by State Health Officer Porter that 2 new cases of smallpox had been reported to him from Manatee County—1 at Palmetto and 1 at Live Oak. The last case at Palmetto was contracted from the case I reported June 5, he being an inmate of the same house and one of those quarantined when the case was diagnosed. In this connection I am reminded that the physician in charge had the two family cats killed to prevent contagion being conveyed by means of their wanderings.

Respectfully,

CLAUDE C. PIERCE,
Assistant Surgeon.

Inspection of vessels at Seattle, Wash.

SEATTLE, WASH., *July 3, 1902.*

SIR: I have the honor to report that the following vessels were inspected at this port during the month of June, 1902:

June 1, steamship *Centennial;* crew, 60; passengers, 110; steamship *Kimball;* crew, 56; passengers, 104; steamship *Garonne;* crew, 136; passengers, 404; steamship *Senator;* crew, 80; passengers, 270. June 3, steamship *Ohio;* crew, 78; passengers, 470. June 7, steamship *Indiana;* crew, 55; passengers, 73; steamship *Valencia;* crew, 66; passengers, 205. June 11, steamship *Conemaugh;* crew, 49; passengers, none. June 25, steamship *Nome City;* crew, 52; passengers, 213.

Respectfully,

CHAS. B. FORD,
Acting Assistant Surgeon.

Inspection service at Eastport, Me.

EASTPORT, ME., *July 10, 1902.*

SIR: I beg to submit the following report of work done at this inspection station during the week ended Thursday, July 10, 1902:

Arrival at Reedy Island Quarantine of vessels from Cuban ports.

REEDY ISLAND QUARANTINE,
via Port Penn, Del., July 6, 1902.

SIR: Through the medical officer in command of national quarantine service on Delaware Bay and River, I have the honor to report the arrival at this station of the following vessels:

July 2, steamship *Donald*, from Banes, with fruit; no passengers; bill of health signed by J. R. Ariza, port physician; steamship *British Prince*, from Cienfuegos, with sugar; no passengers; bill of health signed by Passed Assistant Surgeon Guitéras.

Respectfully,

T. F. RICHARDSON,
Assistant Surgeon, In Command.

Arrival at Baltimore of vessels from Cuban and Central American ports.

BALTIMORE, MD., *July 12, 1902.*

SIR: I have to report the arrival of the following vessels at this port for the week ended this day: British steamship *Royal Exchange*, from Santiago de Cuba, with ore; British steamship *Ely*, from Banes, Cuba, with fruit; British steamship *Hestia*, from Daiquiri, with ore; Netherland steamship *Callisto*, from Daiquiri, with ore; Norwegian steamship *Ulriken*, from Santiago de Cuba, with ore; Norwegian steamship *Storfond*, from Daiquiri, with ore; Uruguayan bark *Primus*, from Havana, with old railroad iron; American schooner *John A. Matheson*, from San Andres, with fruit; Norwegian steamship *Fulton*, from Baracoa, with fruit.

Respectfully, T. E. CUNNINGHAM,
Collector.

REPORTS FROM THE MEXICAN BORDER.

El Paso, Tex., July 5, 1902—Inspection service.—I have the honor to submit herewith summary of transactions at this station for the week ended July 5, 1902. Inspection of Mexican Central Railroad passengers, 201; inspection of Rio Grande and Pacific Railroad passengers, 15; special inspection of passengers from San Luis Potosi, 4; inspection of immigrants, 200; inspection of tribe of 17 Gypsies; disinfection of clothing, blankets, etc., 47 pieces; disinfection of soiled linen imported for laundry work, 517 pieces; vaccination of immigrants and their children, 11.

E. ALEXANDER,
Acting Assistant Surgeon.

Laredo, Tex., July 7—Inspection service.—I have the honor to submit the following inspection report for week ended July 5, 1902. Number of passenger trains from Mexico inspected, 14; persons on trains from Mexico inspected, 527; immigrants inspected and passed, 33; immigrants vaccinated upon entry, 8.

H. J. HAMILTON,
Acting Assistant Surgeon.

Statistical reports of States and cities of the United States—Yearly and monthly.

CALIFORNIA—*Stockton.*—Month of June, 1902. Estimated population, 20,000. Total number of deaths, 15, including 1 from tuberculosis.

GEORGIA—*Augusta.*—Month of June, 1902. Estimated population, 41,441. Total number of deaths, 105, including enteric fever, 3; smallpox, 1, and 14 from tuberculosis.

Columbus.—Month of June, 1902. Estimated population, 19,303—white, 10,276; colored, 9,027. Total number of deaths from disease, 49—white, 14; colored, 35—including enteric fever, 1, and 1 from phthisis pulmonalis.

ILLINOIS—*Peoria.*—Month of June, 1902. Estimated population, 75,811. Total number of deaths, 79, including enteric fever, 1, and 3 from tuberculosis.

Springfield.—Month of June, 1902. Census population, 34,159. Total number of deaths, 36, including diphtheria, 1, and 9 from tuberculosis.

INDIANA—*Smallpox in June.*—Five hundred and twenty-five cases and 3 deaths were reported in June. This is an improvement as compared to May, when there were 692 cases and 1 death. Sixty counties were invaded in May, and 49 in June. The counties reporting smallpox this month were: Adams, 61 cases; Allen, 9; Blackford, 10; Boone, 16; Brown, 10; Clay, 1; Daviess, 24; Dearborn, 1; Decatur, 5; Dekalb, 5; Delaware, 15; Floyd, 1; Franklin, 35; Grant, 7; Greene, 5; Hamilton, 5; Hancock, 3; Harrison, 6; Hendricks, 4; Henry, 38; Huntington, 5; Jay, 3; Jennings, 3; Knox, 47; Lake, 6; Laporte, 6; Lawrence, 3; Madison, 5; Marion, 34; Martin, 30; Miami, 2; Orange, 3; Pike, 3; Porter, 12; Pulaski, 1; Putnam, 1; Randolph, 2; Ripley, 4; Rush, 3; Scott, 1; Stark, 5; St. Joseph, 3; Sullivan, 4; Tippecanoe, 41; Tipton, 4; Vanderburg, 5; Vermillion, 1; Vigo, 12; Warrick, 13; Washington, 2; Wells, 9. The deaths reported were in Henry County 1 and Boone County 2. The counties reporting smallpox in June but not in May were Brown, Lake, Lawrence, Martin, Putnam, and Starke.

IOWA.—*Keokuk.*—Month of June, 1902. Estimated population, 19,500. Total number of deaths, 19. No deaths from contagious diseases.

MARYLAND.—*Cumberland.*—Month of June, 1902. Estimated population, 17,128. Total number of deaths, 27, including whooping cough, 1, and 4 from tuberculosis.

MICHIGAN.—Reports to the State board of health, Lansing, for the week ended July 5, 1902, from 74 observers, indicate that diarrhea, cholera morbus, pneumonia, dysentery, and smallpox were more prevalent and tonsillitis, bronchitis, influenza, measles, diphtheria, and remittent fever were less prevalent than in the preceding week.

Meningitis was reported present at 5, diphtheria at 24, whooping cough at 25, enteric fever at 41, scarlet fever at 48, measles at 58, smallpox at 78, and phthisis pulmonalis at 235 places.

Grand Rapids.—Month of May, 1902. Estimated population, 90,000. Total number of deaths, 79, including diphtheria, 1; enteric fever, 3; measles, 1, and 10 from phthisis pulmonalis.

OKLAHOMA—*Oklahoma City.*—Month of April, 1902. Estimated population, 20,000. Total number of deaths, 26, including diphtheria, 3, and 2 from tuberculosis.

Month of May, 1902. Total number of deaths, 31, including diphtheria, 2; enteric fever, 1; scarlet fever, 1, and 9 from phthisis pulmonalis.

Month of June, 1902. Total number of deaths, 40, including enteric fever, 1, and 3 from phthisis pulmonalis.

PENNSYLVANIA—*Dunmore.*—Month of June, 1902. Estimated population, 15,000. Total number of deaths, 8, including measles, 1, and 1 from tuberculosis.

RHODE ISLAND—*Newport.*—Month of June, 1902. Estimated population, 23,000. Total number of deaths, 31, including scarlet fever, 1, and 7 from tuberculosis.

TENNESSEE—*Chattanooga.*—Month of June, 1902. Estimated population, 40,000—white, 27,000; colored, 13,000. Total number of deaths, 55, including enteric fever, 1, and 9 from tuberculosis.

Knoxville.—Month of June, 1902. Estimated population, 35,000—white, 26,000; colored, 9,000. Total number of deaths, 56, including enteric fever, 1; measles, 1; whooping cough, 2, and 16 from tuberculosis.

BRITISH HONDURAS.

Weekly report of conditions and transactions at Belize—Fruit port.

BELIZE, BRITISH HONDURAS, *June 30, 1902.*

SIR: I have the honor to make the following report of the conditions and transactions at this port during the week ended June 28, 1902:

Population according to census of 1901, 9,113; present officially estimated population, about 7,000. Number of cases and deaths from yellow fever during the week, none; number of cases and deaths from smallpox during the week, none; number of cases and deaths from

typhus fever during the week, none; number of cases and deaths from cholera during the week, none; number of cases and deaths from plague during the week, none; number of deaths from other causes during the week, 4. Causes of death, meningitis, cirrhosis of liver, catarrhal enteritis, and natural causes. General sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following vessels: June 26, steamship *Condor;* crew, 16; passengers from this port, none; passengers in transit, none; baggage disinfected, none. June 27, steamship *Anselm;* crew, 42; passengers from this port, 7; passengers in transit, 25; baggage disinfected, 10 pieces.

Respectfully,

R. H. PETERS,
Acting Assistant Surgeon.

The SURGEON-GENERAL.

CANADA.

Inspection of immigrants at Quebec.

QUEBEC, CANADA, *June 30, 1902.*

SIR: I have the honor to report that for the week ended June 28 there were inspected 753 immigrants; passed, 733; detained, 20.

Respectfully,

VICTOR G. HEISER,
Assistant Surgeon.

The SURGEON-GENERAL.

QUEBEC, CANADA, *July 7, 1902.*

SIR: I have the honor to report that for the week ended July 5 there were inspected 433 immigrants; passed, 415; detained, 18.

Respectfully,

VICTOR G. HEISER,
Assistant Surgeon.

The SURGEON-GENERAL.

CHINA.

Cholera at Shanghai.

SHANGHAI, CHINA, *June 4, 1902.*

SIR: I have to report that during the last month there have been about 20 cases of cholera, cholerine, or disease with cholera symptoms among the foreigners of Shanghai. I hear from the missionary doctors that there are many cases of cholera amonst the natives in the Chinese city of Shanghai, in Soochow, and in the towns tributary to Soochow. It is impossible to get any accurate figures with regard to this matter. I will keep you posted each mail as well as I can in this matter.

Respectfully,

JOHN GOODNOW,
United States Consul-General.

The ASSISTANT SECRETARY OF STATE.

Cholera at Tangku.

SHANGHAI, CHINA, *June 7, 1902.*

SIR: I have to report that we were infoamed yesterday by the customs here that cholera is epidemic at Tangku. The Russian consul-general

also reports that in 1 ship arriving in Newchwang yesterday from Tangku, 30 cases of cholera were found. Undoubtedly the cholera is on the increase here, but we have no statistics of the Chinese population.

Respectfully, JOHN GOODNOW,
United States Consul-General.

The ASSISTANT SECRETARY OF STATE.

Cholera raging in towns along Kweilin River.

CANTON, CHINA, *July 12, 1902.*

Cholera raging in all towns along Kweilin River, Kwang-Si. Three thousand died, Pinglo. Over 10,000 Kweilam.

ROBERT M. MCWADE,
United States Consul.

The ASSISTANT SECRETARY OF STATE.

COLOMBIA.

Weekly report of conditions and transactions at Bocas del Toro—Fruit port.

BOCAS DEL TORO, COLOMBIA, *July 1, 1902.*

SIR: I have the honor to make the following report of the conditions and transactions at this port during the week ended June 30, 1902:

Population according to census, not obtainable. Number of cases and deaths from yellow fever during the week, none; number of cases and deaths from smallpox during the week, none; number of cases and deaths from typhus fever during the week, none; number of cases and deaths from cholera during the week, none; number of cases and deaths from plague during the week, none; number of deaths from other causes during the week, 3. Prevailing diseases, malarial. Of the 3 deaths noted above, 1 was an adult, female, cause of death not known; 1 adult, Chinaman, cause of death unknown; 1 soldier, malarial fever. General sanitary condition of this port and the surrounding country during the week, good. There has been a slight increase in the number of cases of malarial fever.

Bills of health were issued to the following vessels: June 25, steamship *Harald;* crew, 20; passengers from this port, none; passengers in transit, none; baggage disinfected, none. June 26, steamship *Holstein;* crew, 23; passengers from this port, none; passengers in transit, none; baggage disinfected, none. June 29, steamship *Colombia;* crew, 18; passengers from this port, none; passengers in transit, none; baggage disinfected, none.

Respectfully, PAUL OSTERHOUT,
Acting Assistant Surgeon.

The SURGEON-GENERAL.

Health conditions among troops at Bocas del Toro.

BOCAS DEL TORO, COLOMBIA, *July 2, 1902.*

SIR: I have the honor to make the following report as to the health conditions existing among the soldiers at this point. I deem it best to make this separate from the weekly report in order to more fully explain the situation.

A large number of troops were brought here and distributed to the different subports, as stated in my weekly report of May 26, 1902. Since that time the revolutionary excitement has somewhat subsided,

and the authorities have returned those fit for service to Panama or other ports. During the past week they brought the sick ones, numbering about 200, to Bocas del Toro. With the permission of their attending physician, I have visited the houses in which they are quartered: on one occasion with Dr. Mohr, resident physician of the United Fruit Company's hospital. I found them suffering from chronic and acute malarial fevers; some had dysentery, due to the same cause In my opinion, this is due to bad food and general neglect. I saw no evidence whatever of any contagious or infectious disease.

* * * * * * *

Respectfully, PAUL OSTERHOUT,
Acting Assistant Surgeon.

The SURGEON-GENERAL.

COSTA RICA.

Weekly report of conditions and transactions at Port Limon—Fruit port.

PORT LIMON, COSTA RICA, *July 3, 1902.*

SIR: I have the honor to make the following report of the conditions and transactions at this port during the week ended July 3, 1902:

Present officially estimated population, 4,000. Number of cases and deaths from yellow fever during the week, 1 case, no deaths; number of cases and deaths from smallpox during the week, none; number of cases and deaths from typhus fever during the week, none; number of cases and deaths from cholera during the week, none; number of cases and deaths from plague during the week, none; number of deaths from other causes during the week, 6. Prevailing diseases, yellow fever, malarial fever, and enteritis. The 1 case of yellow fever noted herein, American, white, male, a late arrival here, was admitted to the isolation ward of the United Fruit Company's hospital here, June 29 last. General sanitary condition of this port and the surrounding country during the week was not good. The 6 deaths noted above occurred in this port, 2 white and 4 colored, all males. Due to, respectively, marasmus, pernicious malarial fever, ascites, dysentery, and chronic gastro-enteritis. Two of 3 deaths occurred in the hospitals here.

Bills of health were issued to the following vessels: June 27, steamship *Brighton;* crew, 23; passengers from this port, none; passengers in transit, none; baggage disinfected, none; steamship *Kitty;* crew, 20; passengers from this port, none; passengers in transit, none; baggage disinfected, none. June 28, steamship *Venus;* crew, 30; passengers from this port, none; passengers in transit, none; baggage disinfected, none. June 30, steamship *Atlas;* crew, 45; passengers from this port, 12; passengers in transit, 6; baggage disinfected, none.

Respectfully, WM. H. CARSON,
Acting Assistant Surgeon.

The SURGEON-GENERAL.

CUBA.

Report from Cienfuegos.

CIENFUEGOS, CUBA, *July 7, 1902.*

SIR: Through Surg. A. H. Glennan, I have the honor to transmit herewith a report for the week ended July 5, 1902.

During the above-mentioned period, 18 deaths occurred in this city; showing a mortality of 23.46 per 1,000 inhabitants per annum. Three

bills of health were issued vessels prior to departure for the United States. The steamship *Hiso*, bound for New Orleans, was disinfected. Nine health certificates were issued to passengers leaving this port bound to the United States. Sixty-one deaths occurred in this city during the past month of June, representing an annual death rate per 1,000 of 12.30. Reports to the quarantine officer in command of the fifth quarantine division of Cuba, show that the health condition of the ports comprised within the division are good.

Respectfully,

G. M. GUITÉRAS,
Passed Assistant Surgeon.

The SURGEON-GENERAL.

A death from yellow fever at Gibara.

[Cablegram.]

NUEVITAS, CUBA, *July 16, 1902.*

WYMAN: One death yellow fever Gibara—MCCONNELL.

Report from Havana—Mortuary statistics and quarantine transactions—An effort made to continue disinfection of viveros destined for Florida waters.

HAVANA, CUBA, *July 8, 1902.*

SIR: The following report of the transactions of the Service for the week ended July 5, 1902, is submitted:

Telegraphic directions have been issued to the sanitary inspectors stationed at Matanzas, Nuevitas, Santiago de Cuba, and Cienfuegos to continue forwarding the weekly blank form of vessels inspected or disinfected (outgoing quarantine), writing "No transactions" across the face of the blank when such is the case.

An effort has been made to continue the inspection and disinfection of the viveros, or fishing vessels, leaving the harbor of Havana for Florida waters, but as they claim that they do not land upon the Florida coast, there is no law compelling them to submit to such inspection since the establishment of the Republic of Cuba. As a matter of fact, the danger from conveyance of yellow fever by these fishing smacks is a minimum one. No cases of the disease have been officially reported upon the island.

The following are the transactions of the disinfecting plants and office during the week:

OFFICE.

Number of vessels inspected and granted bills of health	14
Number of crews of outgoing vessels inspected	733
Number of passengers, outgoing vessels, inspected	255
Number of health certificates issued	10
Number of immune certificates issued	67
Number of applications for immune certificates rejected	13

SANATOR.

Number of vessels and cargoes disinfected	8
Number of vessels undergoing disinfection	1
Number of pieces of baggage and dunnage disinfected	458
Number of passengers and crews (outgoing) inspected	163

SHORE PLANT.

Number of pieces of baggage disinfected	34
Number of pieces of express matter disinfected	22
Number of pieces of baggage inspected and passed	65
Number of pieces of express matter inspected and passed	26
Number of pieces of freight inspected and passed	1,272

I inclose herewith the usual mortuary report for the week.

Respectfully, A. H. GLENNAN,
Surgeon.

The SURGEON-GENERAL.

[Inclosure.]

Mortuary report of the city of Havana, Cuba, for the week ended July 5, 1902.

Disease—	Deaths.
Typhoid	1
Enteritis	7
Tuberculosis	13
Pneumonia	7
Bronchitis	1
Malaria	1
Meningitis	7
Scarlet fever	1
Leprosy	1
Cancer	2
Total deaths from all causes	97

Reports from Matanzas, Cardenas, Isabela de Sagua, and Caibarien.

MATANZAS, CUBA, *July 7, 1902.*

SIR: Through Surg. A. H. Glennan, Havana, Cuba., I have the honor to submit the following report of the transactions at this port for the week ended June 28, 1902: Four bills of health were issued to vessels leaving this port for the United States as follows: June 24, British steamship *Ethelbryhta*, bound for New York. June 25, Norwegian steamship *Daphne*, bound for New Orleans, La., was disinfected prior to departure. June 27, British steamship *Camperdown* was disinfected prior to departure for New Orleans. June 28, schooner *Dominguita Sardiñas*, bound for the Gulf of Mexico. No quarantinable disease was reported in this district. Mortality reports for this port and seaports in this district are inclosed.

Respectfully, R. H. VON EZDORF,
Assistant Surgeon.

The SURGEON-GENERAL.

[Inclosure.]

Mortality reports for week ended June 28, 1902.

Matanzas.—Tuberculosis, 4; carcinoma, 3; enteritis, 2; athrepsia, 1; meningitis, 1. Total, 11. Annual rate of mortality for week, 10.74.

Cardenas.—Infantile tetanus, 3; entero-colitis, acute, 2; rachitis, 1; heart disease, 1; senile debility, 1. Total, 8. Annual rate of mortality for week, 16.80.

Isabela de Sagua.—Tuberculosis, pulmonary, 2; athrepsia, 1; alcholism, chronic, 1; arterio-sclerosis, 1; nephritis, parenchymatous, 1; diarrhea, chronic, 1; la grippe, 1; cachexia, 1; pleuro-pneumonia, 1. Total, 10. Annual rate of mortality for the week, 24,45.

Caibarien.—One death due to malarial fever.

Report from Nuevitas.

NUEVITAS, CUBA, *July 7, 1902.*

SIR: Through the chief quarantine officer for the island of Cuba, I have the honor to submit the following report for the week ended June 28, 1902:

During this week there was 1 bill of health issued to the steamship *Fanita*, bound for Key West, Fla. Crew immune to yellow fever. One death from internal hemorrhage (stab wound).

Puerto Padre.—One death from heart disease.

Gibara.—One death from delirium tremens.

Banes and Baracoa.—No reports.

There has been no report of quarantinable disease in this district. I am forwarding under separate cover the weekly abstract of bills of health issued.

Respectfully, E. F. MCCONNELL,
Acting Assistant Surgeon.

The SURGEON-GENERAL.

Report from Santiago de Cuba—Mortuary statistics and quarantine transactions.

SANTIAGO DE CUBA, *June 30, 1902.*

SIR: Through Surg. A. H. Glennan, Havana, I have the honor to forward herewith mortuary statistics for the weeks from June 15 to June 21, 1902, and from June 22 to June 28, 1902.

Respectfully, ALEXANDER B. MCDOWELL,
Acting Assistant Surgeon.

The SURGEON-GENERAL.

Mortuary statistics from June 15 to June 21, 1902, inclusive, for the port of Santiago de Cuba.

Fever, intermittent malarial	5

Diarrhea and enteritis (under 2 years)	4
Bright's disease	1
Cystitis, chronic	1
Ill-defined or unspecified causes of death	1
Total	19

Annual rate of mortality for the week, 22.97 per 1,000. Estimated population, 43,000.

Mortuary statistics from June 22 to June 28, 1902, inclusive, for the port of Santiago de Cuba.

Fever, intermittent malarial	3
La grippe	3
Tubercle of lungs	1
Encephalitis	1
Simple meningitis	1
Organic diseases of the heart	2
Broncho-pneumonia	1
Pulmonary congestion	1
Diarrhea and enteritis (under 2 years)	3
Diarrhea and enteritis, chronic	1
Hemophilia	1
Senile debility	1
Ill-defined or unspecified causes of death	3
Total	22

Annual rate of mortality for the week, 31.44 per 1,000. Estimated population, 43,000.

SANTIAGO DE CUBA, *July 1, 1902.*

SIR: Through Surg. A. H. Glennan, Havana, I have the honor to submit herewith a summary of the transactions at this station for the month of June, 1902:

Number of vessels inspected and bills of health issued	26
Number of crew inspected	862
Number of passengers inspected	437
Number of health certificates issued	160
Number of immune certificates issued	16
Number of vessels disinfected	3

Respectfully, ALEXANDER B. MCDOWELL,
Acting Assistant Surgeon.

The SURGEON GENERAL.

GERMANY.

Report from Berlin—Plague and cholera in various countries.

BERLIN, GERMANY, *June 30, 1902.*

SIR: I have the honor to transmit herewith the latest information regarding plague and cholera, obtained from the imperial health office (Kaiserliches-Gesundheitsamt) at Berlin:

Plague.

EGYPT.—Between June 6 and June 12, inclusive, 7 new plague cases and 1 death were registered in Egypt.

BRITISH EAST INDIA.—In the Bombay Presidency, during the week ended May 30, there were registered 615 plague cases and 485 deaths, of which 169 cases with 166 deaths occurred in the city of Bombay, and 68 cases with 59 deaths in the port and town of Karachi.

COCHIN-CHINA.—During the month of April several cases of plague occurred in Hanoi. For every dead rat 4 cents have been offered by the authorities, the result being that 6,000 rats were delivered between April 24 and April 30.

JAPAN.—On May 13 a plague patient died in the hospital for epidemic diseases at Nagasaki.

QUEENSLAND.—During the week ended May 10, 9 new plague cases and 4 deaths were registered in Brisbane.

Plague and cholera.

BRITISH INDIA.—In Calcutta, during the week ended May 17, 209 persons died of plague and 64 died of cholera.

Respectfully, FRANK H. MASON,
United States Consul-General.

The SURGEON-GENERAL.

Ordinance of health office of Bremen relative to the killing of rats in holds of vessels.

BREMEN, GERMANY, *June 20, 1902.*

SIR: The health office at Bremen, on June 12, 1902, published the following new measure for the prevention of the plague:

It is now held that the best means of killing rats in the holds of vessels is by fumigation. Such fumigation will be attended to by the fire department upon six hours' notice at the police station in the free port.

The following fees will be charged for fumigating vessels and for furnishing the apparatus and all the necessary materials: For a vessel of 1,000 cubic centimeters space, 12 marks ($3); for a vessel of 1001 to 2,000 cubic centimeters space, 20 marks ($5), and for a vessel of more than 2,000 cubic centimeters space, 35 marks ($8.75).

These rates will be charged when the vessels contain not more than 3 compartments. For every additional compartment 4 marks ($1) must be paid. All fees to be paid at the police station in the free port.

Respectfully, HENRY W. DIEDERICH,
United States Consul.

The ASSISTANT SECRETARY OF STATE.

Vessels from ports in China quarantined at Bremen on account of cholera.

BREMEN, GERMANY, *June 28, 1902.*

SIR: I have the honor to inform the Department that the health officer of this port, in view of the fact that cholera has broken out at Shanghai, has issued an order placing all vessels coming from Chinese ports under strict quarantine regulations.

Respectfully, HENRY W. DIEDERICH,
United States Consul.

The ASSISTANT SECRETARY OF STATE.

GUATEMALA.

Weekly report of conditions and transactions at Livingston—Fruit port.

LIVINGSTON, GUATEMALA, *July 2, 1902*

SIR: I have the honor to make the following report of the conditions and transactions at this port during the week ended July 1, 1902:

Present officially estimated population, 3,000. Number of cases and deaths from yellow fever during the week, none; number of cases and deaths from smallpox during the week, none; number of cases and deaths from typhus fever during the week, none; number of cases and deaths from cholera during the week, none; number of cases and deaths from plague during the week, none; number of cases and deaths from other causes during the week, none. Prevailing disease, malarial fever. General sanitary condition of this port and the surrounding country during the week, good.

Bill of health was issued to the following vessel: July 2, steamship *Managua;* crew, 17; passengers from this port, none; passengers in transit, none; baggage disinfected, none.

Respectfully, GUY A. DARCANTEL,
For A. J. SMITH,
Acting Assistant Surgeon.

The SURGEON-GENERAL.

Report from Puerto Barrios—Sanitary conditions and inspection of vessels.

PUERTO BARRIOS, GUATEMALA, *June 30, 1902.*

SIR: The health and sanitary condition of Puerto Barrios and the surrounding country for the week ended June 28, 1902, have been good. The following vessels have cleared from this port: June 24, British steamship *Anselm*, for New Orleans, with 9 passengers and 35 pieces of disinfected baggage; Norwegian steamship *Condor*, for New Orleans, with cargo of coffee and fruit.

Respectfully, D. P. ALBERS,
Resident Medical Inspector for the Louisiana State Board of Health, Puerto Barrios.

The SURGEON-GENERAL.

HONDURAS.

Weekly report of conditions and transactions at La Ceiba—Fruit port.

LA CEIBA, HONDURAS, *June 28, 1902.*

SIR: I have the honor to make the following report of the conditions and transactions at this port during the week ended June 28, 1902:

Present officially estimated population, about 4,000. Number of cases and deaths from yellow fever during the week, none; number of cases and deaths from smallpox during the week, none; number of cases and deaths from typhus fever during the week, none; number of cases and deaths from cholera during the week, none; number of cases and deaths from plague during the week, none; number of deaths from other causes during the week, 4. Prevailing disease, malaria. General sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following vessels: June 22, Norwegian steamship *Geo. Dumois;* crew, 18; passengers from this port, none; passengers in transit, none; baggage disinfected, none. June 23, British schooner *Royalist;* crew, 7; passengers from this port, none; passengers in transit, none; baggage disinfected, none.

Respectfully, W. B. ROBERTSON,
Acting Assistant Surgeon.

The SURGEON-GENERAL.

Weekly report of conditions and transactions at Puerto Cortez—Fruit port.

PUERTO CORTEZ, HONDURAS, *July 2, 1902.*

SIR: I have the honor to make the following report of the conditions and transactions at this port during the week ended July 2, 1902:

Population according to census of 1896, 1,856. Present officially estimated population, 2,000. Number of cases and deaths from yellow fever during the week, none; number of cases and deaths from smallpox during the week, none; number of cases and deaths from typhus fever during the week, none; number of cases and deaths from cholera during the week, none; number of cases and deaths from plague during the week, none; number of deaths from other causes during the week, 1. Prevailing disease, malarial fever. General sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following vessels: June 26, steamship *Anselm;* crew, 42; passengers from this port, 14 (1 Belize); passengers in transit, 12; baggage disinfected, 21 pieces. June 27, steamship *Hiram;* crew, 14; passengers from this port, none; passengers in transit, none; baggage disinfected, none.

Respectfully, S. H. BACKUS,
Acting Assistant Surgeon.

The SURGEON-GENERAL.

ITALY.

Report from Naples—Bubonic plague at Constantinople—Report of the year's transactions at Naples and Palermo.

NAPLES, ITALY, *June 30, 1902.*

SIR: I have the honor to report that for the week ended June 28, 1902, the following ships were inspected at Naples:

June 24, the steamship *Roma,* of the Fabre Line, bound with passengers and cargo for New York. There were inspected and passed

935 steerage passengers and 376 pieces of large baggage; 1,400 pieces of baggage were disinfected by steam. The rejection of 41 steerage passengers was advised.

June 25, the steamship *Liguria*, of the Italian Central Navigation Company, bound with passengers and cargo for New York. There were inspected and passed 613 steerage passengers and 57 pieces of large baggage; 850 pieces of baggage were disinfected by steam. The rejection of 34 steerage passengers was advised.

June 28, the steamship *Karamania*, of the Anchor Line, bound with passengers and cargo for New York. There were inspected and passed 376 steerage passengers and 83 pieces of large baggage; 550 pieces of baggage were disinfected by steam. The rejection of 29 steerage passengers was advised.

Smallpox at Naples.

During the week ended June 28, 1902, there were officially reported at Naples 5 cases of smallpox with no deaths.

Bubonic plague at Constantinople.

A report, dated to-day, states that 4 cases of bubonic plague have occurred at Constantinople, and that the sanitary council has been called in extraordinary session.

The year's transactions at Naples and Palermo.

The report of this station for the period beginning September 16, 1901, and ending June 30, 1902, is now in course of preparation. It will show that during the period covered by the report 199 vessels with 147,280 emigrants were inspected at Naples and Palermo. At Naples and Palermo, 26,742 pieces of baggage were inspected. The number of pieces of baggage disinfected at Naples and Palermo was 184,927. All the emigrants from Naples and most of those from Palermo were vaccinated before going aboard ship.

Respectfully,

J. M. EAGER,
Passed Assistant Surgeon.

The SURGEON-GENERAL.

LEEWARD ISLANDS.

Quarantine against Barbados on account of smallpox raised.

ST. CHRISTOPHER, LEEWARD ISLANDS, *June 14, 1902.*

SIR: Being the recipient of inquiries regarding quarantine against Barbados, I have the honor herewith to forward official communications regarding same.

Respectfully,

JOSEPH HAVEN,
United States Commercial Agent.

The ASSISTANT SECRETARY OF STATE.

[Inclosures.]

COLONIAL SECRETARY'S OFFICE,
St. Christopher, Leeward Islands, March 31, 1902.

Quarantine.

Whereas, it has been made to appear that smallpox prevails in Barbados, it is hereby notified for general information that Barbados has this day been declared, until further notice, an infected port within the meaning of the quarantine act No. 26 of 1876.

By his excellency's command,

GEO. MELVILLE,
Colonial Secretary.

COLONIAL SECRETARY'S OFFICE,
St. Christopher, Leeward Islands, May 6, 1902.

It is hereby notified for general information that the quarantine of four weeks from April 8, imposed against the colony of Barbados has, by the governor and federal executive council of the Leeward Islands been raised to-day.

By command,

GEO. MELVILLE,
Colonial Secretary.

MADAGASCAR.

Plague at Majunga—Probable source of infection, Arab coastwise trading vessels.

TAMATAVE, MADAGASCAR, *May 31, 1902.*

SIR: Referring to paragraph 379 of the consular regulations I have the honor to confirm by cablegram of the 26th instant: "Secretary of State *Washington, D. C.:* Plague Majunga.—HUNT." And to further expain that it was officially announced here on the 26th instant that 9 cases had occurred, 4 of which were fa al, and since that date the Inland Telegraph reports about 4 cases a day.

Majunga, the largest port on the west coast of Madagascar, is in continual communication by Arab dhows with Bombay during the north monsoon, and this fact is not improbably answerable for the outbreak. The sanitary precautions, however, of Majunga are sufficiently effective to allay any serious ground for alarm as to its spreading further than the Indian population.

Respectfully,

WILLIAM H. HUNT,
United States Consul.

The ASSISTANT SECRETARY OF STATE.

MEXICO.

Report from Tampico—Sanitary conditions.

TAMPICO, MEXICO, *July 7, 1902.*

SIR: I have the honor to transmit herewith abstract of bills of health issued at this port during the week ended July 5, 1902. During the same period, there were recorded in the office of the juez civil a total of 15 deaths, due to causes as follows: Malaria (including perniciosa), 4; enteric fever, 1; pneumonia, 1; tuberculosis, 2; gastro intestinal, 2; miscellaneous, 5. The sanitary condition of the port remains satisfactory.

Respectfully,

JOS. GOLDBERGER,
Assistant Surgeon.

The SURGEON-GENERAL.

Report from Vera Cruz—Favorable results from the work of exterminating mosquitoes.

VERA CRUZ, MEXICO, *June 30, 1902.*

SIR: During the week ended June 28 there were reported 21 cases and 11 deaths from yellow fever, 1 case and 2 deaths from smallpox, and 38 deaths from all causes.

The work of exterminating the mosquitoes is progressing favorably under the direction of the local authorities. No cases of fever have developed in the blocks of houses that have been treated by oil and freed from breeding places of the mosquitoes. The blocks that have been treated furnished many cases of fever during the past month, and the stamping out of the fever in those squares speaks well for the care and

thoroughness of the work. With a larger force of men it is evident that the city can be freed from the fever this summer.

The British steamship *William Cliff* arrived here from Tampico on June 27 with 1 case of malaria on board. On June 28 4 more cases developed, on June 29 4 others were attacked, and on June 30 2 more had chills. The fevers promptly reacted to quinine and the diagnosis of malaria was confirmed by a blood examination by Drs. Parker, Beyer, and Pothier. The facts of the cases were incorporated in a letter to the quarantine physician at the port of destination of the vessel.

Respectfully, S. H. HODGSON,
Acting Assistant Surgeon.

The SURGEON-GENERAL.

NICARAGUA.

Weekly report of conditions and transactions at Bluefields—Fruit port.

BLUEFIELDS, NICARAGUA, *July 6, 1902.*

SIR: I have the honor to make the following report of the conditions and transactions at this port during the week ended July 5, 1902:

Present officially estimated population, 4,000. Number of cases and deaths from yellow fever during the week, none; number of cases and deaths from smallpox during the week, none; number of cases and deaths from typhus fever during the week, none; number of cases and deaths from cholera during the week, none; number of cases and deaths from plague during the week, none; number of deaths from other causes during the week, 1. Prevailing disease, malarial fever in a mild form. General sanitary condition of this port and the surrounding country during the week, very good.

Bills of health were issued to the following vessels: June 29, steamship *Esther;* crew, 19; passengers from this port, 10; passengers in transit, none; baggage disinfected, 17 pieces. July 3, steamship *Banan;* crew, 19; passengers from this port, none; passengers in transit, none; baggage disinfected, none. July 5, steamship *Geo. W. Kelly;* crew, 20; passengers from this port, 1; passengers in transit, none; baggage disinfected, 2 pieces.

Respectfully, D. W. GOODMAN,
Acting Assistant Surgeon.

The SURGEON-GENERAL.

NORWAY.

Proclamation of quarantine against certain localities on account of plague.

CHRISTIANIA, NORWAY, *June 23, 1902*

SIR: Inclosed I have the honor to send duplicate copies of a quarantine proclamation, issued by the royal Norwegian justice and police departments on June 18, 1902. I also send translation.

Respectfully, HENRY BORDEWICH,
United States Consul General.

The ASSISTANT SECRETARY OF STATE.

[Inclosure.]

Proclamation from the royal Norwegian Government's departments of justice and police.

CHRISTIANA, NORWAY, *June 18, 1902.*

A royal proclamation was made on the 16th instant as follows:

It is hereby ordered, in compliance with section 2 in law of July 12, 1848, relating to quarantine, that the city of Buenos Ayres and the other ports in Argentina, also Madagascar, shall until further notice be considered infected with the oriental plague, and the quarantine regulations laid down in said law and in circular of October 13, 1900, as regards plague, etc., are to take effect at once.

At the same time it is hereby proclaimed that British East Africa, which, in proclamation of May 22, 1902, was declared infected with plague, shall no longer be considered as so infected.

With which all concerned respectfully have to comply.

Which is hereby brought to public notice, while it must be remembered that according to prior proclamations of February 1, 1897, June 27 and August 22, 1899, May 23, 1900, February 28, August 12, and September 30, 1901, and March 20 and May 22, 1902, the city of Constantinople in Turkey, Cape Town and Port Elizabeth in South Africa, Réunion Islands and Mauritius, also the cities of Porte Alegre, Pernambuco, and Paranagua in Brazil shall until further notice be considered infected with oriental plague.

A number of copies of this proclamation are inclosed.

SOREN AARSTED,
GEORG JOHANNESEN,

PHILIPPINE ISLANDS.

Cholera reports for Manila and the provinces—The epidemic abating.

[Passed Asst. Surg. J. C. Perry, chief quarantine officer for the Philippine Islands, reports that from March 15 to May 17, 1902, inclusive, 20 vessels and 2 cascoes on which cholera cases and deaths had occurred were treated at quarantine station, Mariveles. Of these, 16 were American vessels plying between Manila and other Philippine ports, and became infected in Manila Bay; 1 was the British steamship *Rubi*, from Hongkong, on which a cholera case occurred at Hongkong; 1 a Japanese vessel from Manila, and 2 were army transports, the U. S. steamships *Warren* and *Hancock*. In the case of the *Warren*, 1 fatal case occurred in the barracks in which the troops were segregated, necessitating bathing of the men and redisinfection of their effects. In the case of each vessel treated the vessel was disinfected and mechanically cleansed, the crew and passengers were bathed and their effects disinfected. Reinfection occurred at station in the case of 1 American vessel. All precautions were repeated, deck cargo was removed, and tanks were treated.]

MANILA, P. I., *May 26, 1902.*

SIR: I have the honor to transmit herewith reports of cholera in the Philippine Islands for the week ended May 17, 1902. It will be noted that little change has taken place in the situation, although a diminution in the number of cases may reasonably be expected to occur during the next two weeks, since the epidemic has already existed for two months.

Respectfully,

J. C. PERRY,
Passed Assistant Surgeon,
Chief Quarantine Officer for the Philippine Islands.

The SURGEON-GENERAL.

[Inclosures.]

This week's report is incomplete, as no returns were received from any of the provincial towns for the 17th.

MANILA, P. I., *May 29, 1902.*

SIR: I have the honor to submit herewith report of cholera in the Philippine Islands for the week ended May 24, 1902. An examination of the data shows that the epidemic is abating both in Manila and the provinces, and the disease is expected to subside at an early date.

Respectfully,

J. C. PERRY,
Passed Assistant Surgeon,
Chief Quarantine Officer for the Philippine Islands.

The SURGEON-GENERAL,

[Inclosures.]

PORTO RICO.

Report from Ponce—Sanitary conditions and inspection of vessels.

PONCE, P. R., *June 30, 1902.*

SIR: Through the chief quarantine officer for Porto Rico, I have the honor to transmit herewith the quarantine and abstract of bills of health reports for the week ended June 28, 1902, and the report of immigrants inspected at this port during the month of June, 1902. Two vessels were inspected and passed and 5 bills of health were issued. The sanitary condition of the city remains about the same. No quarantinable disease has been reported to this office.

Respectfully,

W. W. KING,
Assistant Surgeon.

The SURGEON-GENERAL.

SAN JUAN, P. R., *July 1, 1902.*

SIR: I submit herewith report of alien steerage passengers arriving at this port during the week ended June 28, 1902. June 28, Spanish steamship *Montserrat*, from Barcelona, Malaga, Cadiz, Las Palmas, Teneriffe, and La Palma, with 26 immigrants; Cuban steamship *Maria Herrera*, from Cuban and Dominican ports, with 9 immigrants; Spanish steamship *Miguel M. Pinillos*, from Genoa, Marseilles Barcelona, Valencia, Malaga, Cadiz, Las Palmas, Teneriffe, and La Palma, with 6 immigrants. Total, 41.

Respectfully,

H. S. MATHEWSON,
Passed Assistant Surgeon,
Chief Quarantine Officer for Porto Rico.

The SURGEON-GENERAL.

Inspection of immigrants at the port of San Juan, P. R., during the month of June, 1902.

Total number of immigrants inspected, 105; number passed, 105.

H. S. MATHEWSON,
Passed Assistant Surgeon,
Chief Quarantine Officer for Porto Rico.

The SURGEON-GENERAL.

Inspection of immigrants at the port of Ponce, P. R., during the month of June, 1902.

Total number of immigrants inspected, 35; number passed, 35.

W. W. KING,
Assistant Surgeon.

The SURGEON-GENERAL.

RUSSIA.

Plague at Odessa.

DEPARTMENT OF STATE,
Washington, D. C., July 11, 1902.

SIR: For the information of the Public Health and Marine-Hospital Service, I have the honor to advise you that the Department is in receipt of a telegram dated the 10th instant, from the consul of the United States at Odessa, Russia, which reads: "Plague."

Respectfully,

JOHN HAY,
Secretary of State.

The SECRETARY OF THE TREASURY.

Foreign and insular statistical reports of countries and cities—Yearly and monthly.

AFRICA—*Sierra Leone.*—Two weeks ended June 6, 1902. Estimated population, 40,000. Total number of deaths reported, 14. No contagious diseases reported.

BAHAMAS—*Dunmore Town.*—Four weeks ended July 4, 1902. Estimated population, 1,232. Total number of deaths, 4. No contagious diseases.

Governors Harbor.—Week ended June 21, 1902. Estimated population, 1,500. No deaths and no contagious diseases.

Green Turtle Cay—Abaco.—Two weeks ended June 18, 1902. Estimated population, 3,314. No deaths and no contagious diseases.

Nassau.—Two weeks ended July 2, 1902. Estimated population, 12,535. Number of deaths not reported. No contagious diseases reported.

CANADA—*Quebec—Sherbrooke.*—Month of June, 1902. Estimated population, 12,000. Total number of deaths, 25, including diphtheria, 1, and 1 from enteric fever.

Winnipeg.—Month of June, 1902. Estimated population, 50,000. Total number of deaths not reported. Three deaths from measles and 3 from scarlet fever reported.

CHILE—*Antofagasta.*—Month of May, 1902. Estimated population, 8,000. Total number of deaths, 57, including 6 from phthisis pulmonalis.

CHINA—*Amoy.*—Two weeks ended May 31, 1902. Estimated population, 250,000. Total number of deaths not reported. A few sporadic cases of cholera reported.

CUBA—*Havana.*—Month of May, 1902. Estimated population, 275,000. Total number of deaths, 588, including enteric fever, 4; scarlet fever, 1; whooping cough, 1, and 74 from tuberculosis.

Guanabacoa.—Month of May, 1902. Estimated population, 20,080. Total number of deaths, 37, including enteric fever, 1, and 3 from tuberculosis.

DUTCH GUIANA—*Paramaribo.*—Month of May, 1902. Estimated population, 31,626. Total number of deaths, 89. No contagious diseases reported.

EAST AFRICA—*Lorenzo Marques.*—Month of April, 1902. Estimated population, 7,000. Total number of deaths, 29, including 2 from phthisis pulmonalis.

FRANCE—*St. Etienne.*—Two weeks ended June 15, 1902. Estimated population, 146,559. Total number of deaths not reported. One death from diphtheria, 5 from measles, and 18 from tuberculosis reported.

GERMANY—*Hanover.*—Month of April, 1902. Estimated population, 242,751. Total number of deaths, 281, including 31 from infectious diseases.

GIBRALTAR.—Three weeks ended June 22, 1902. Estimated population, 27,460. Total number of deaths, 22. No contagious diseases.

GREAT BRITAIN—*England and Wales.*—The deaths registered in 76 great towns in England and Wales during the week ended June 21, 1902, correspond to an annual rate of 14.9 per 1,000 of the aggregate population, which is estimated at 14,862,909.

London.—One thousand two hundred and sixty-six deaths were registered during the week, including measles, 56; scarlet fever, 12; diphtheria, 16; whooping cough, 34; enteric fever, 2; smallpox, 24, and diarrhea and dysentery, 14. The deaths from all causes correspond to an annual rate of 14.4 per 1,000. In Greater London 1,704 deaths were registered. In the "outer ring" the deaths included 5 from diphtheria, 9 from measles, 1 from scarlet fever, 12 from smallpox, and 8 from whooping cough.

Ireland.—The average annual death rate represented by the deaths registered during the week ended June 21, 1902, in the 21 principal town districts of Ireland was 18.9 per 1,000 of the population, which is estimated at 1,092,322. The lowest rate was recorded in Ballymena, viz, 4.8, and the highest in Newtownards, viz, 40.1 per 1,000. In Dublin and suburbs 139 deaths were registered, including diphtheria, 1; enteric fever, 1; measles, 5; scarlet fever, 1, and 37 from tuberculosis.

Scotland.—The deaths registered in 8 principal towns during the week

ended June 21, 1902, correspond to an annual rate of 16.4 per 1,000 of the population, which is estimated at 1,679,923. The lowest mortality was recorded in Leith, viz, 12.6, and the highest in Paisley, viz, 19.2 per 1,000. The aggregate number of deaths registered from all causes was 531, including diphtheria, 2; measles, 18; scarlet fever, 4, and 13 from whooping cough.

ITALY.—*Genoa.*—Month of April, 1902. Estimated population, 221,-774. Total number of deaths, 323, including diphtheria, 7; enteric fever, 3; measles, 16; scarlet fever, 6, and 45 from tuberculosis.

JAMAICA.—*Kingston.*—Month of June, 1902. Estimated population, 46,542. Total number of deaths, 91, including 13 from phthisis pulmonalis.

JAPAN—*Nagasaki.*—Ten days ended May 31, 1902. Estimated population, 131,700. Total number of deaths not reported. One death from enteric fever reported.

Ten days ended June 10, 1902. Total number of deaths not reported. One death from diphtheria and 2 deaths from enteric fever reported.

ST. HELENA.—Two weeks ended May 31, 1902. Estimated population, including troops and prisoners of war, 12,000. Total number of deaths, 19, including enteric fever, 10, and 1 from tuberculosis.

WEST INDIES—*St. Thomas.*—Three weeks ended June 13, 1902. Estimated population, 11,012. Total number of deaths, 23. No contagious diseases.

Two weeks ended June 27, 1902. Estimated population, 11,012. Total number of deaths, 16. No contagious diseases.

Cholera, yellow fever, plague, and smallpox, June 28, 1902, to July 18, 1902.

[Reports received by the Surgeon-General, Public Health and Marine-Hospital Service, from United States consuls through the Department of State and other sources.]

[For reports received from December 28, 1901, to June 27, 1902, see PUBLIC HEALTH REPORTS for June 27, 1902.]
